

To the Federal Communications Commission:

I would like to voice my strong support of The American Radio Relay Leagues Petition, RM-10867. I feel that this is the proper avenue to take to ensure the growth of Amateur Radio. I also believe that this plan is the best thought out and that it is the most fair compromise, taking into account the numerous other proposals. The American Radio league has a long history of lobbying in the cause of Amateur radio, and has successfully established a good working relationship with the FCC. I respectfully request that the members of the commission would enact this petition swiftly in its entirety. Thank you for your Consideration.
